# ORCON CARPET SEAM TAPES

The ORCON high performance tapes are guaranteed to accommodate even the toughest carpet installation with superior adhesive formulation. All tapes are fiberglass reinforced for added strength and flexibility and backed with silicone treated paper (unless otherwise noted). ORCON standard tapes come in 22-yard rolls-10 rolls to a case, and 5 rolls to a case in the wide format (unless otherwise noted for some specialty tapes). The ORCON Tape-in-the-Box™ format comes in rolls of 69.33 yards -one roll per box.

## Tapenology Behind ORCON Tape Products

The ORCON seam tape selections utilize three distinct performance technologies as coded below:

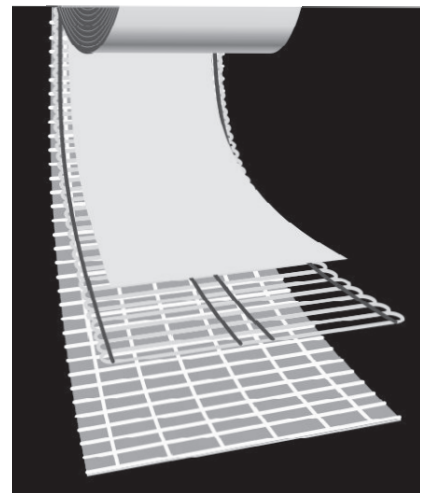

### CT SERIES

The ORCON original bonded oriented continuous strand (BOCS) scrim. An exceptionally low profiling tape for a wide range of conventional applications.

### K SERIES

The ORCON knitted scrim tape. Engineered for ActionBac® and heavier secondary backing systems. Most tapes are at 3¾" paper width, except where noted.

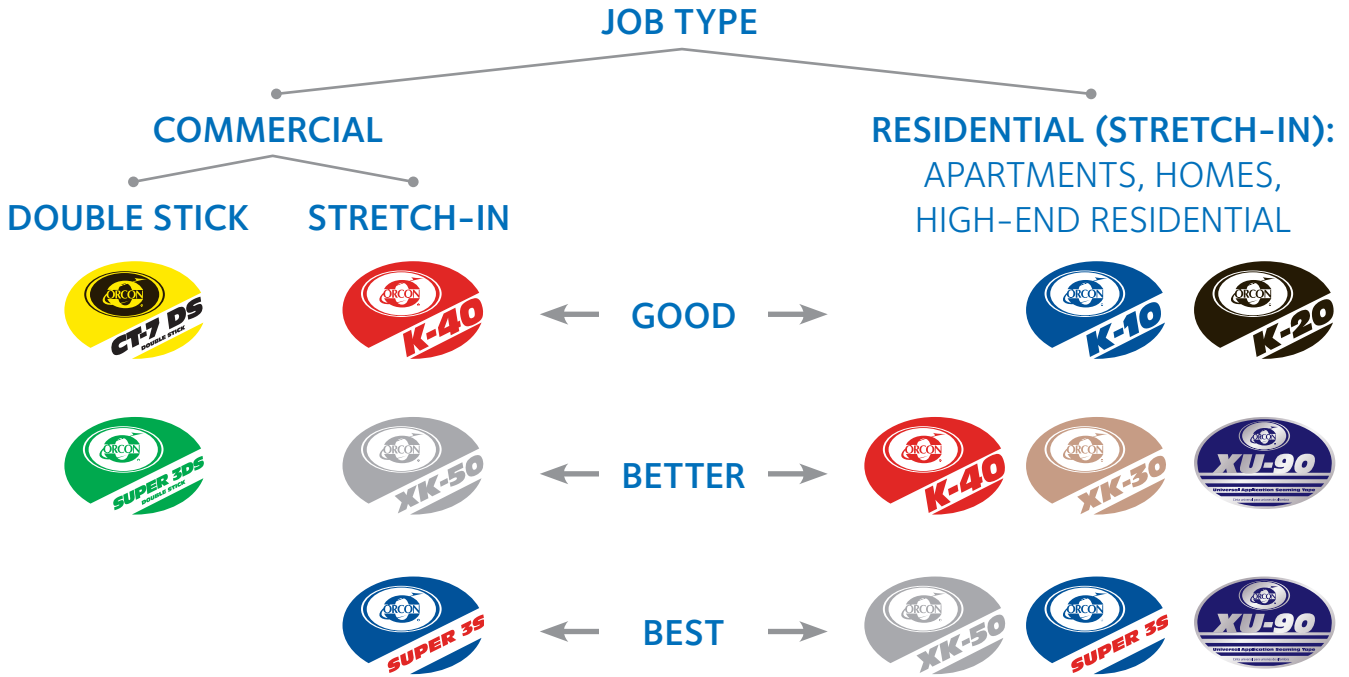

### SUPER SERIES

The ORCON most advanced tape. Engineered with premium adhesives and a combination of BOCS and knitted scrim. Reduces hinging, adds strength, and provides greater adhesive penetration. For woven, axminster and heavier commercial secondary backings.

# CARPET SEAM TAPE DECISION TREE

Because we understand your varying seam tape needs for different types of jobs, as well as carpeting backing picks, we've simplified our recommendations on the chart below to help you make the best choice:

**CARPET BACKINGS  
(TIGHTER-PICK,  
OR "HIGH PICK COUNT")**

In order to get adhesive into 'high pick count' backings, a lighter, lower-melt adhesive should be used. In other words, the 'GOOD' choices shown above are examples of this, however XU-90 is also an excellent choice, as it is a low-melting tape and will seam virtually anything!
